Digital Solutions Center

Digital Solutions Center

OUR SERVICES

We provide expertise to transform and modernize systems with new technologies based on best market practices in the digital technology field.

- › Digital development solutions
- › Strategic digital transformation support
- › Training and innovation laboratories
- › JAVA, .NET and Agile communities of practice

OUR EXPERTISE

- › Web – micro services, API development
- › Information and transactional website development
- › Agile transformation support
- › DevOps
- › Quality assurance

OUR PRACTICES

A group comprising two communities of practice: Java/.Net and Agile, providing:

- › The best guidance
- › Support through continuous training
- › A relationship with their technology communities
- › Maximized collaboration opportunities
- › More knowledge sharing opportunities

OUR ADDED VALUE

We build business partnerships that are based on transparency and collaboration. Turnkey or co-managed projects are carried out from our offices on a risk-sharing basis. We provide expert digital technology advice along with project implementation capacity.

OUR COMMITMENT

“ Drive growth for our employees, our business partners and our organization through engagement, collaborative leadership and a culture of innovation.

”

OUR COMPETENCIES

TRAINING AND INNOVATION LABORATORIES

Our laboratories' main focus is the development of our advisors through a culture of innovation and continuous improvement. In addition to continuous training programs, our laboratories offer a showcase of new technology trends and an environment that encourages proofs of concept.

To support our services, we offer:

- A community of practice and an Agile and Scrum Master coach training center
- A community of practice and Atlassian support services

OUR APPROACH

The Digital Solutions Center offers more than "remote development"; it applies strategic levers that bring greater value to your organization.

- Support for developing opportunity studies to demonstrate the savings generated by a transformation
- Collaboration to define requirements
- Project planning, follow-up and delivery
- Continuous improvement driven by our laboratories and communities of practice

Our approach fosters partnerships to capitalize on strong cooperation enabling the prioritization of needs and sharing of project implementation risks.

OUR SPECIALITIES

Web and cloud computing development

We offer services for digital transformation and modernization of obsolete systems by replacing them with new technologies.

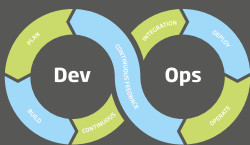

We encourage the use of the latest technologies along with modern and proven methods.

Agility

Our projects are primarily based on collaboration in creating multidisciplinary teams.

- Iterative delivery
- Focus on MVP (Minimal Viable Product)
- Proof of concept and prototyping
- Project support through our Agile process

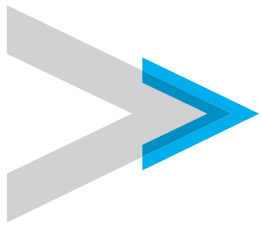

DevOps

We maximize our velocity and delivery capacity by leveraging the benefits of the DevOps approach.

- Automated tests
- Seamless compilation and integration
