

Technology Architecture

How we can help

Alithya will help plan and execute your projects:

- > Guidelines
- > Development and improvement
- > Integration

What Makes Us Different

Alithya is renowned for its technology integration-based approach.

- > Architectures closely aligned with your business, development and security needs
- > Consistency with the organization's technology guidelines, objectives and priorities (agility mobility, cloud computing, etc.)

Our highly qualified experts and technologists have specific and complementary skills. To maximize the value and quality of our interventions, they are involved in projects from start to finish.

Microsoft ● Oracle ● Oracle EBS ● ITIL ● Governance ● Security

Our Approach

Our approach makes it easier to develop architecture and ensure it is consistent with business needs.

- > Development and integration of reusable and interoperable information systems
- > Overlapping notions of security to ensure availability, integrity and confidentiality
- > Integration of ongoing improvement principles
- > Based on support for business activities and contribution to user satisfaction

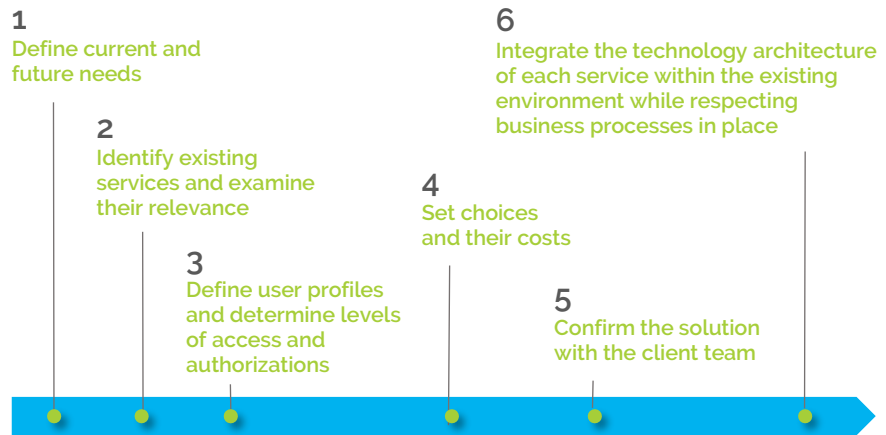

Results

Our results are closely aligned with your business strategy and objectives.

- > Integration of organization's architectural elements
- > Strong ties between different business units
- > Positioning based on user needs and organizational culture
- > Technology and security architectures that take costs and feasibility into account

Our Process

The technology architecture cycle consists of the following steps:

Our Areas of Interventions
