

Governance and Strategic Alignment

Your Situation

Your market, environment and clients are transforming. To ensure your competitive advantage and long-term survival, you want to:

- > Review your targets, whether for a period of growth or decline
- > Analyze one or more strategic elements, to help develop and optimize them
- > Ensure efficiency and customer value are balanced and aligned
- > Be better organized, to achieve objectives and support decision-making
- > Allow and encourage performance- and innovation-based management

Our Solution

- > Customized services to fulfill a range of governance mandates, in whole or in part
- > An expertise overview based on your organization, on realistic solutions and on profitable operations through changes
- > Based on industry best practices and prudent use of information, our operations take into account analytical aspects (what exists), normative aspects (what should exist) and innovative aspects (change-related).

Our Approach

Our flexible, results-based approach is adapted to your organization's philosophy and values. It consists of four main stages, to help organizations achieve their desired results and adjust quickly to new needs and requirements:

The "What": Understanding and modelling of larger picture

Vision: Illustration and description of targets, solutions, processes, capabilities and indicators

Communication: Planning of coherent actions, sharing of roles, and appropriation by stakeholders

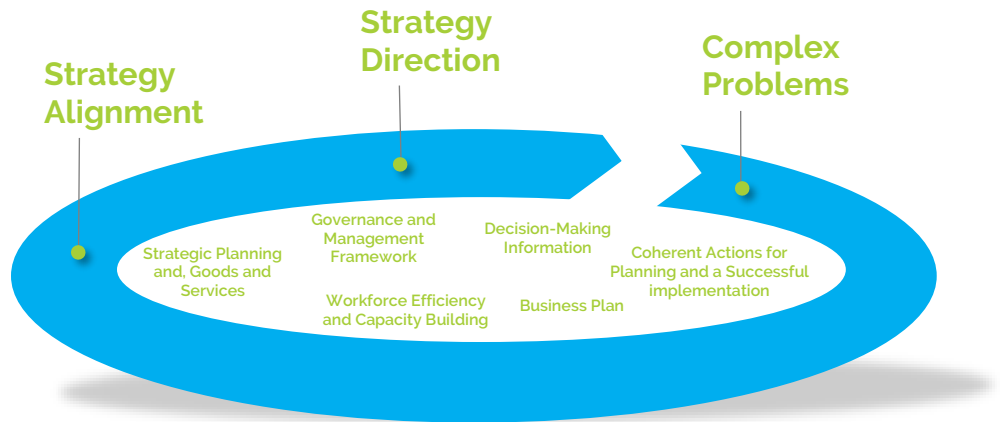

Actions: Achievement of results by focusing on the important and the concrete

A Skilled Team Makes All the Difference

- > Objective advice for your project portfolio management process
- > Skilled and experienced consultants with a thorough knowledge of best practices
- > Use of Alithya Strategy standard processes and foundations (templates, standard deliverables, measurement tools, etc.)
- > Our multidisciplinary team can effectively address a wide range of issues
- > We provide oversight and innovation for our clients
- > Access to a pool of experts to answer any and all questions
